## **NATIONAL DEFENSE BUDGET ESTIMATES - FY 2005**

This document is prepared and distributed as a convenient reference source for the National Defense budget estimates for FY 2005. It also provides selected current and constant dollar historical time series for National Defense, the total Federal Budget, and the U.S. economy. Information included here reflects the President's budget as submitted to Congress on February 2, 2004.

## **NATIONAL DEFENSE DATA**

### **RETIRED PAY/ACCRUAL**

For the years FY 1945-FY 1984, the DoD budget authority and outlay tables in this book show military retired pay on a cash basis. After FY 1984, both budget authority and outlays reflect only the accrual cost of military retirement. The Office of Management and Budget (OMB) historical tables which show National Defense budget authority and outlays have moved the actual military retired pay accounts from the DoD Military Function (051) to the Income Security Function (600), and have been replaced it with an imputed estimate for military retired pay accrual in function (051). Our data reflect the DoD budget request and include military retired pay though FY 1984, and the accrual cost of military retirement thereafter.

The FY 2003 budget shifts the costs of civilian and military health care from the central accounts to which they had been charged to the affected program account as accruals. For comparability, OMB included imputed amounts for these shifts in their FY 2001 and FY 2002 data for the DoD Military Function (051). We do not include the imputed accrual costs of these transfers, and differences are included under "OMB rounding difference" where appropriate.

### **RETIRED PAY ACCRUAL ADJUSTMENTS**

In 1990, updated actuarial assumptions reduced the retired pay accrual normal cost percentage (NCP) for full-time and part-time personnel. The effect is a decrease of about \$2.5 billion annually beginning in FY 1990. This adjustment is treated as a price change and not as a programmatic change and the military pay deflators have been adjusted accordingly.

### **FEDERAL EMPLOYEES' RETIREMENT SYSTEM (FERS) ADJUSTMENTS**

The additional costs for retirement contributions due to enactment of the Federal Employees' Retirement System (FERS) Act of 1986, P.L. 99-335, are included as inflationary increases and the DoD deflators have been adjusted accordingly.

### **CHANGE IN ACCOUNT STRUCTURE**

In FY 1992 and FY 1993, funds were appropriated in Defense accounts which supported domestic, rather than defense programs. Using the rules and definitions in the Budget Enforcement Act, OMB scored these appropriations in the correct domestic functions rather than in the DoD military function (051). Data in this book display the DoD budget request and include these amounts.

### **CALCULATION METHODOLOGY**

There are some discrepancies between the amounts shown for several DoD accounts in this document and those same figures in OMB publications. These differences result from the way in which account totals were calculated. Beginning with the FY 1998 budget, OMB added data that had been rounded to millions of dollars, while all DoD data in this book were derived from non-rounded data. In those instances where a discrepancy exists, an amount is shown for "OMB rounding difference" in the appropriate tables.

## **CHANGES IN SCOREKEEPING**

**Rescissions:** Before the amended FY 1989 budget was submitted, rescissions of prior year unobligated balances were reflected as adjustments only against TOA in the applicable program year. However, since then, both the Congressional Budget Office (CBO) and OMB score such rescissions as reductions to current year Budget Authority with one large exception.

\$15 billion was appropriated for the Persian Gulf Regional Defense Fund in FY 1991. Only \$304 million was transferred to other defense accounts to offset Operation Desert Storm costs. The balance of \$14,696 million was rescinded and FY 1991 BA was reduced rather than reducing BA in the current year.

**Reappropriations:** Reappropriations previously were scored as new Budget Authority in the year of legislation. However, in presenting the amended FY 1989 budget, CBO and OMB directed scoring of reappropriations as Budget Authority in the first year of new availability [first year after original availability would lapse].

## **GROSS NATIONAL PRODUCT and GROSS DOMESTIC PRODUCT**

In December 1991, U. S. national income and product accounts (NIPAs) shifted emphasis from the Gross National Product (GNP) to the Gross Domestic Product (GDP). Both GNP and GDP measure output at market prices, but in a slightly different manner.

GNP measures the market value of all goods and services produced during a particular time period by U.S. individuals, businesses and government; it includes income earned by U.S. owned corporations overseas, by U.S. residents working abroad, but excludes income earned in the United States by residents of the rest of the world.

GDP measures the market value of all goods and services produced during a particular time period by individuals, businesses and government in the United States, whether they are U.S. or foreign citizens or American owned or foreign owned firms; it includes income earned by U.S. owned corporations overseas, by U.S. residents working abroad, but excludes income earned in the United States by non-U.S. residents.

All price indices in Chapter 7 are based on the GDP. The distinction between GNP and GDP is not very great for the United States because relatively few U.S. residents work abroad and U.S. earnings on foreign investments are about the same as foreign earnings in the United States.

## CHAPTER 1

### NATIONAL DEFENSE - AN OVERVIEW

This chapter provides an overview of the National Defense function of the federal budget. The National Defense Function (function 050) includes: DoD military activities (subfunction 051); the atomic energy defense activities of the Department of Energy (subfunction 053); and defense related activities of other federal agencies (subfunction 054). Data are provided in three standard budget categories: budget authority (BA), total obligational authority (TOA), and outlays. These categories are defined below.

#### DEFINITIONS

**Budget Authority** -- BA is the authority to incur legally binding obligations of the Government which will result in immediate or future outlays. Most Defense BA is provided by Congress in the form of enacted appropriations.

**Total Obligational Authority** -- TOA is a DoD financial term which expresses the value of the DIRECT Defense program for a fiscal year. TOA may differ from BA for several reasons, including:

- (1) BA lapsing before obligations were incurred (decreasing TOA with no effect on BA).
- (2) Proposed or enacted legislation transferring unobligated balances for which the purpose of the balances has changed. Scoring rules require that such a transfer be reflected as a change in BA in the year in which the transfer occurs (reduction of BA in the losing account, increase of BA in the gaining account). TOA is adjusted in the original program, regardless of when the transaction occurs.
- (3) Reappropriations (the extension of availability of previously appropriated funds). Reappropriations are scored as BA in the first year of extended availability. TOA is unchanged.
- (4) Rescissions (Congressional action canceling new budget authority or unobligated balances). Scoring rules require that rescissions be scored as reductions in budget authority in the fiscal year in which the rescissions are enacted. TOA is adjusted in the program year of the rescinded funds. If rescissions are proposed in the budget, they would be reflected as if enacted.
- (5) Net Offsetting Receipts (collections from the public that arise out of the business-type or market-oriented activities of the Government and are deposited in receipt accounts). Net offsetting receipts are deducted from BA but have no effect on TOA.

**Outlays** -- Outlays, or expenditures, are the liquidation of the Government's obligations. Outlays generally represent cash payments.

Outlays in a given fiscal year may represent the liquidation of obligations incurred over a number of years. There is a time lag between budgeting funds (congressional appropriation), signing contracts and placing orders (obligations), receiving goods or services and making

payments (liquidating obligations). For major acquisition and construction programs, the Department operates under a "full funding" policy by which Congress approves, in the year of the request, sufficient funds to complete a given quantity of items, even though it may take a number of years to actually build and deliver these items. Thus, in extreme cases (such as building an aircraft carrier), final outlays may be recorded a decade after the budget authority for the program is approved.

**Discretionary Programs** – Discretionary programs are funded annually through the appropriations process. The scorekeeping guidelines in the Budget Enforcement Act (BEA) of 1990, as amended, established annual limits or "caps" on the amount of BA and outlays available for these programs. If either the discretionary budget authority or outlay caps are exceeded, an across-the-board reduction of non-exempt resources, known as sequestration, is required to eliminate the excess.

**Mandatory Programs** – Mandatory programs, also known as "pay-as-you-go" or PAYGO, are direct spending programs and receipts defined as entitlement authority, food stamp programs and budget authority authorized by permanent law rather than in appropriations acts. The BEA requires a sequestration to offset any net cost resulting from legislation enacted before October 1, 2002 that affects direct spending or receipts. Social Security, the Postal Service, legislation specifically designated as emergency requirements, and legislation fully funding the Federal Government's commitment to protect insured deposits are exempt from PAYGO enforcement.

**Emergency Programs** – These are programs that the President designates as "emergency requirements" and the Congress so designates in law, and are not bound by the overall caps on discretionary programs. Once these emergency appropriations are released, they are recorded as discretionary and the BEA caps are adjusted accordingly.

CONTINGENCY ESTIMATES AND  
DOD BUDGET REQUEST BY APPROPRIATION ACT  
FY 2005 BUDGET

Table 2-1 shows the **Budget Authority and Outlays** associated with contingency estimates for the National Defense function in the budget. These contingency estimates represent the costs and/or savings associated with legislation proposed by the Administration to include rescissions, asset sales and other legislative proposals. The contingency estimates also include the outlays scored against DoD's general transfer authority and other technical adjustments.

### CHAPTER 3

#### **LEGISLATIVE AUTHORIZATIONS**

**Authorization** is substantive legislation which provides the authority for an agency to carry out a particular program. Authorization may be annual, for a specified number of years, or indefinite. Most National Defense activities require annual authorization before the Congress may appropriate funds. The largest amount in the request not requiring annual authorization is military pay; military end strength, rather than military pay, is authorized.

Table 3-1 provides a reconciliation between the FY 2005 DoD Authorization Request, Appropriation Request, Budget Authority, and Total Obligational Authority.

Table 3-2 presents personnel authorizations enacted for FY 2003 and FY 2004 and the FY 2005 budget request for DoD. Selected Reserves are shown as end strength in accordance with Congressional direction.

### CHRONOLOGIES

Chronologies have assumed much greater importance because of the scorekeeping provisions of the Congressional Budget and Impoundment Act.

Table 4-1 provides a chronology of FY 2003 National Defense budget authority, beginning with the FY 2003 budget estimate submitted to Congress in February, 2002. This estimate is shown with congressional action, rescissions/reappropriations and transfers which occurred during CY 2002 and resulted in the FY 2003 column of the FY 2004 budget submitted to Congress in February, 2003. Finally, reappropriations/rescissions, contract authority and other actions are shown which resulted in the FY 2003 column of the FY 2005 budget request.

Table 4-2 provides a chronology of FY 2004 National Defense budget authority, beginning with the FY 2004 budget estimate submitted to Congress in February, 2003. This estimate is shown with congressional action, rescissions/reappropriations, requested supplemental, and transfers which occurred during CY 2003 and resulted in the FY 2004 column of the FY 2005 budget submitted to Congress in February, 2004.

## CHAPTER 5

### PAY RAISES, PRICE INCREASES, AND TREATMENT OF INFLATION

#### DEFINITIONS

##### Inflation

**Inflation** is an increase in the general level of prices in the economy. Inflation does not mean that prices rise evenly or that all prices are rising. Some prices may be constant and others actually may be falling. Prices of some commodities rise faster than others because of differences in the magnitude and direction of changes in supply and demand in various markets. There are many different measures of inflation:

**a.     GDP Implicit Price Deflator**

The **Gross Domestic Product (GDP)** implicit price deflator, generally regarded as the best single measure of broad price movements in the economy, is the ratio of GDP in current prices to GDP in constant prices.

**b.     Consumer Price Index**

The **Consumer Price Index (CPI)** is a measure of the average change over time in the prices paid by urban consumers for a fixed market basket of consumer goods and services. Although it is often called the "Cost-of-Living Index" it measures only price changes, just one of several factors affecting living costs. The CPI reflects spending patterns for each of two population groups: **All Urban Consumers CPI-U**, which represents about 87 percent of the total U.S. population, and **Urban Wage Earners and Clerical Workers CPI-W**, which represents about 32 percent of the total U.S. population and is a subset of the CPI-U's population.

**c.     DoD Purchase Index**

The **DoD Purchase Index** developed by OUSD(C) consists of outyear projections based upon fiscal guidance from OMB linked to actual DoD purchase price experience calculated by the Commerce Department's Bureau of Economic Analysis (BEA).

##### Base Year

The **Base Year** is a point of reference representing a fixed price level, and is expressed as 1.00 (e.g., FY 2005 = 1.00). The base year for a set of index numbers can be changed to another year by dividing each number in the series by the index for the desired base year.

##### Aggregate Price

The **Aggregate Price** is a weighted average of individual prices, where each price is weighted by an item's contribution to total expenditures. The aggregate price is thus a notional price developed to measure changes in inflation and is greatly affected by the relative mix of the items considered, and the change of that mix over time.

### **Annual Rate of Change in Prices**

The **Annual Rate of Change** measures the year-to-year change in prices, computed by dividing one year's aggregate price by the preceding year's aggregate price.

### **Index**

An **Index** is a component of a time series which measures the change in prices from a fixed point in time, and is calculated by setting the base year equal to one, and then multiplying the index value of each year by one plus the annual rate of change of the next year.

### **Current Dollars**

An item or service is priced in **Current Dollars** if the prices contain all inflationary increases expected to occur in a program over the duration of the spendout of an appropriation. Current dollars are also called "then year" dollars, "budget" dollars or "fully inflated" dollars.

### **Constant Dollars**

**Constant Dollars** measure the value of purchased goods and services at price levels which are the same as the base or reference year. Constant dollars do not contain any adjustments for inflationary changes that have occurred or are forecast to occur outside the base year.

### **Real Growth**

**Real Program Growth** - the year-to-year change in constant dollars - is usually expressed as a percentage, and is computed by dividing the constant dollars for one year by the constant dollars of the previous year and subtracting one. Real growth always implies a relationship between two or more time periods.

### **Spendout Rates**

**Spendout Rates** (also called outlay or expenditure rates) are the expected cash flow for a given appropriation expressed as the percent expected to be spent in a given year. These rates are appropriation unique and range from two years in the pay accounts to as much as ten years in ship construction.

### **Outlay Index**

An **Outlay Index** measures the impact of changes in inflation on outlays; is used to convert outlays from current to constant dollars; is used to compute the amount of inflation to be added to a base price; and is used to reprice estimates when inflation assumptions are revised. An index for outlays is calculated by compounding annual rates from any base year.

## **TOA Index**

A **TOA Index** measures the impact of changes in inflation on TOA, given a specific fiscal year and phasing of work performed (or outlays), and is usually developed using the standard outlay rates for an appropriation. The TOA index measures the budgeted change of inflation from a fixed point.

## **TABLES**

Table 5-1 Provides inflation indices, in base year FY 2005, for selected economy-wide measures as a comparison of inflation in DoD with that in the general economy.

Table 5-2 Provides pay and inflation assumptions used in the FY 2005 budget for DoD outlays. These rates are based on OMB guidance which reflects the change in the GDP deflator. The historical inflation rates for fuel are based on the change in the cost per gallon paid by the customer to the stock fund while the outyear forecasts of fuel increases are based on the Administration's estimate of Refiners Acquisition Cost (RAC). Inflation estimates for all other purchases are in line with the GDP deflator.

Table 5-3 Provides pay and inflation assumptions used in the FY 2005 budget for DoD BA. The pay raises are annual rates and the same as Table 5-2. The purchases rates are based on the annual outlay rates in Table 5-2 converted to BA using the spendout profiles published in Table 5-11.

Table 5-4 Provides inflation indices in base year FY 2005 for each DoD appropriation title to be used in converting TOA from current to constant FY 2005 dollars.

Table 5-5 Provides inflation indices in base year FY 2005 to be used in converting pay and purchases TOA from current to constant FY 2005 dollars.

Table 5-6 Provides inflation indices in base year FY 2005 for each DoD appropriation title to be used in converting BA from current to constant FY 2005 dollars.

Table 5-7 Provides inflation indices in base year FY 2005 to be used in converting pay and purchases BA from current to constant FY 2005 dollars.

Table 5-8 Provides inflation indices in base year FY 2005 for each DoD appropriation title to be used in converting outlays from current to constant FY 2005 dollars.

Table 5-9 Provides inflation indices in base year FY 2005 to be used in converting pay and purchases outlays from current to constant FY 2005 dollars.

Table 5-10 Provides a chronology of inflation estimates since February 1981, and shows that the estimated inflation rate for a given year is revised many times before it becomes actual.

Table 5-11 Provides the outlay rates used in developing outyear inflation factors for estimating future costs of Defense purchases. These rates, which are derived from the rates used to develop the overall outlay estimates, do not allow for lapses in the accounts and only reflect the spending profile for Defense purchases, excluding fuel. The rates used to estimate total Defense outlay levels reflect spending patterns of the total account, including pay and fuel.

Table 5-12 Provides military and civilian [general schedule] pay increases from 1945 to the pay raises assumed in the FY 2005 budget request.

Table 5-13 Provides pay indices in base year FY 2005 for each component of civilian pay in DoD. Separate rates are maintained for general schedule [GS], wage board [WB], direct hire foreign national [DHFN], and indirect hire of foreign national [IHFN].

## CHAPTER 7

### **DEFENSE, THE PUBLIC SECTOR, AND THE ECONOMY**

The data for the National Defense Function shown in Tables 7-1 and 7-2 are consistent with the OMB treatment of military retirement and civilian accrual in all years.

Table 7-1 provides Federal outlays from FY 1945-FY 2008, grouped by: National Defense; Veterans, Space and International Programs; Net Interest; and Social and Economic programs. The Social and Economic category includes the following functions: General Science and Technology (excluding space programs); Natural Resources and Environment; Energy; Agriculture; Commerce and Housing Credit; Transportation; Community and Regional Development; Education, Training, Employment and Social Services; Health; Income Security; Administration of Justice; General Government; Revenue Sharing and general purpose fiscal assistance.

Table 7-2 provides these data in constant FY 1996 prices to be consistent with the latest GDP benchmark by the Department of Commerce.

Table 7-3 provides a breakdown of net U.S. public spending by federal, state, and local components from FY 1945-FY 2008. This excludes government enterprises (such as the postal service, utilities, and liquor stores) except for any support these activities receive from tax funds.

Table 7-4 provides these data in constant FY 1996 prices to be consistent with the latest GDP benchmark by the Department of Commerce.

Table 7-5 provides DoD military and civilian workforce data by component and DoD industry related employment for 1940-2005.

Table 7-6 provides U.S. employment and labor force data for FY 1940-FY 2005.

Table 7-7 is a master percentage table which provides DoD and national defense spending as a percentage of various economic and budgetary aggregates, including DoD and national defense outlays as a percentage of the Federal Budget and of net public spending; DoD employment as a percentage of public employment and the total labor force; and the defense share of GDP on a budget basis.

Beginning in 1953, the civilian work force figures include both U.S. and foreign national direct hires and the foreign national indirect hire employees that support U.S. forces overseas. Beginning with FY 1996, all the Federal civilian work force are measured in Full-time Equivalents (FTE) on this table.

Navy reserve personnel on active duty for Training and Administration of Reserves (TARS) are included in the active Navy prior to FY 1980 and in the Full-Time Guard and Reserve thereafter. Active Duty Military includes the activation of 25,652 National Guard and Reservists in FY 1990 pursuant to sections 673b, Title 10 U.S.C., 17,059 National Guard and Reservists in FY 1991 and 954 National Guard and Reservists in FY 1992 pursuant to sections 672 and 673, Title 10 U.S.C., to support Operation Desert Shield/Desert Storm.
